### REASONS FOR ALLOWANCE

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference cited on the PTO-892 discloses an optical head including a liquid crystal element.

The following is an examiner's statement of reasons for allowance: the prior art of record considered as a whole fails to teach or suggest an optical head comprising: a light source; an object lens for converging a light beam emitted by the light source; and a liquid crystal element arranged between the light source and the object lens; wherein the liquid crystal element comprises electrodes of a plurality of areas in a plane perpendicular to an optical axis of a light beam reflected from an optical disk and a common electrode opposing the electrode portion via a liquid crystal layer, the electrodes comprising first electrodes used for correcting the light beam transmitting when no shift of the object lens occurs relative to the optical axis, **and at least one second electrode provided adjacent to the first electrode groups in a first direction along which the object lens is shifted, and an at least one third electrode provided adjacent to the first electrode groups in a second direction opposite to the first direction.** (bold language emphasized)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Huber whose telephone number is 571-272-7588.
